1. Purpose

The National Student Financial Aid Scheme requires assistance with the resolution of certain audit items.

2. Background

The National Student Financial Aid Scheme (NSFAS) provides financial assistance to eligible students at public universities and at Technical Vocational Education and Training (TVET) colleges throughout South Africa.

NSFAS received a qualified audit opinion in the 2019/ 2020 financial year and requires assistance in the resolution of certain audit findings in order to clear these qualifications.

3. Mandatory requirements

All bids must comply with the mandatory requirements and failure to comply with any of these requirements will immediately disqualify the bid.

Mandatory requirements	Page reference per bidder proposal
The firm must be registered with the South African Institute of Chartered Accountants (SAICA) or the South African Institute of Professional Accountants (SAIPA). This can be evidenced by providing the valid proof of registration of the firm with SAICA or SAIPA.	

4. Functional specifications

The objective of the project is to perform the tasks necessary such that that qualification areas are cleared.

Specifically, this includes qualifications in relation to:

Amounts paid above contract value:

This matter arose during the 2017 academic year when the system generated incorrect loan values in contracts sent to students. NSFAS, however, disbursed loans according to the loan award values resulting in apparent over-disbursements.

In addition to the above, there are also cases where NSFAS disbursed above the contracted value where the loan amount was generated incorrectly in the loan agreement due to an internal control failure.

The service provider is required to:

1. Quantify the full value of the over-disbursement. This will require that 450,000 loan agreements be inspected in order to determine the loan value in the incorrect loan agreement. This value will then need to be compared to the actual loan award and disbursement for each student. NSFAS estimates that at

least 15 resources are required for this aspect of the project to be completed in two (2) months. Additional resources will be required to complete the exercise sooner.

2. Collate the data in a SQL database, or any other appropriate database as agreed with NSFAS, that must be handed over to NSFAS at the end of the project.
3. Issue the corrected loan agreements to students, who will need to agree to the corrected loan agreements. The loan agreements must be corrected in terms of the National Credit Act (NCA).
4. The service provider is expected to assist with obtaining student consents to the corrected agreements in terms of the NCA.
5. The service provider is expected to provide a digital solution (separate to the NSFAS systems) to enable the above, that is handed over to NSFAS as the end of the project.

Areas of possible irregular expenditure due to missing/ incomplete documents:

There are several areas where resources are required in order to assist with the tracking and tracing of missing/ incomplete documents:

TVET colleges

In 2019, TVET colleges assisted with the application funding process for TVET students and were required to maintain mandatory documents in order to support each application. However, during the audit, many of these documents proved to be missing. Our document storage service provider is collating the supporting documents from all 50 TVET colleges, for scanning and indexing per student. Approximately 130,000 student records would need to be assessed.

The service provider is required to:

1. Determine the extent of missing mandatory documents. Our document storage service provider is able to provide an analysis of all documents per student, once scanned and indexed.
2. Obtain the missing documents from institutions, even if this means that the student would need to be contacted.
3. Ensure that all documents are stored such that they are available to NSFAS for future audit reference with ease.

Funding students with disability:

During the 2019/ 2020 audit, the AGSA found that the supporting evidence for the funding of students with disabilities were not complete.

The service provider is required to:

1. Determine and obtain a listing of the total number of students funded in terms of the DHET Disability bursary for both the 2019 and 2020 academic years.
2. Ensure that all students who should be funded in terms of the DHET Disability bursary is indeed funded correctly, and vice versa.
3. Compile a complete file of all mandatory supporting evidence for each student funded in this way, building on the documentation that exists on the NSFAS data management system for each student. This may require liaising with universities in order to obtain the necessary document. NSFAS funds approximately 2,000 students in terms of the DHET Disability bursary per academic year.

Loan conversion:

During the 2019/ 2020-year end audit, the AGSA found that, while loan conversions were performed in according with stated policy, it was not done in terms of the loan terms and conditions of business. NSFAS estimates that this affects all loans since at least 2011 to 2017 but may date back earlier.

The service provider is required to:

1. Determine the extent of the error.
2. Confirm that the actual loan conversion was done in terms of policy.
3. Calculate the error in the loan conversion calculations, going back as far as practicably possible, such that these values can be condoned for audit purposes.

Incorrect interest calculation:

During the 2019/2020-year end, the AGSA found that the Phoenix (NSFAS loan and bursary management system) system was accruing interest on loans incorrectly. The error is believed to have arisen due to the following scenarios:

- During the 2013 academic year and the 2014 financial year, the previous loan management system (LMS) was retired in favour of the Phoenix Loan Management system. From implementation date in October 2013, all active accounts had to be migrated to the Phoenix system. From inspection of a list of accounts not currently accruing interest, management identified a significant amount of accounts that relates to pre implementation of the Phoenix system and therefore is of the view that these accounts were incorrectly migrated to Phoenix.
- In terms of the NSFAS policies, where a student is registered at a public tertiary institution and can provide such proof, even though not currently funded by NSFAS, the student can request that their accounts do not accrue interest at this time. The NSFAS systems do not have workflow, or similarly, times prompts, and therefore the interest accrual flag needs to be controlled manually. Due to accounts where interest was previously accrued and subsequently not accruing, these accounts were identified as the manually controlled interest accrual which was not subsequently turned on.
- In cases where accounts were previously closed, either erroneously or due to transfers being done, it was discovered that these accounts had not been created with the interest automatically accruing from the date of creation.

The service provider is required to:

1. Perform an independent root cause analysis of the issue and determine whether the NSFAS root cause analysis is correct and complete.
2. Based on the root cause analysis, determine the full extent of the calculation error such that it can be presented to the AGSA during the next audit (i.e. 2020/ 2021-year end).
3. Make the necessary system and accounting adjustments in order to correct the issue in the system and reflect the correct interest value in the financial accounts.
4. Assist with the rectification of debtor statements and ensure that these are sent out to all affected students.

Key reconciliations

There are several reconciliations that are not performed, or not performed according to audit standards.

The service provider is required to:

- Reconcile actual disbursement payments to the disbursements as reflected in the loan management system and resolve any reconciling items.
- Perform the reconciliation between the CellBux transactions and those on Phoenix for the 2019 and 2020 academic years and assist with the resolution of reconciling items.
- NSFAS has identified a number of payments to mobile numbers that do not reconcile back to Phoenix accounts with ease. The service provider is required to trace the mobile numbers to valid students and

where this is not possible, to ensure that these mobile numbers are appropriately blocked and flagged against any future disbursements.

- Perform any other reconciliation that may be identified.

Assistance during the 2020/ 2021-year end audit

The service provider will be required to assist with any queries relating to the above during the 2020/ 2021-year end audit.

The service provider may be called upon to assist with additional audit matters not listed specifically above, including any matters that may arise during the 2020/ 2021-year end.

The service provider is expected to ensure that there is adequate training and handover to the NSFAS officials on any new processes and solutions in order sustain solutions in the organization going forward.

On site

The service provider team is expected to be on site in Cape Town at the NSFAS Head Office in Wynberg for the full duration of the project, COVID regulation permitting, as and when required. Should any team member not be able to deliver due to COVID or any other reason, the service provider must provide a suitable replacement, that NSFAS agrees to, within 48 hours.

5. Contract Period

All rectification and disclosure related matters must be completed by the 1 May 2021 so that the annual financial statements can be submitted with the correct accounting values.

The project must complete all remaining deliverables by the end of the audit, which at this stage is set for 31 July 2021.

6. Pricing Schedule

Please consider the inevitable Consumer Price Index (CPI) increases year on year on the pricing upon the duration of the contract period being in excess of a 12-month period. **The pricing must be inclusive of all costs including disbursements (travel, accommodation etc) where applicable.**
